

# **Joe Dragavon, PhD**

Director  
BioFrontiers Advanced Light Microscopy Core  
University of Colorado, Boulder  
3415 Colorado Ave  
Boulder, CO 80309

(303) 735-6988  
(720) 934-2933  
[joseph.dragavon@colorado.edu](mailto:joseph.dragavon@colorado.edu)  
Languages: English, French

## **Professional Experience**

- 2014 – Present    **Director of the BioFrontiers Advanced Light Microscopy Core**  
                            University of Colorado, Boulder
- 2012-2014            **Post-Doctoral Research Fellow**  
                            Plate-Forme d'Imagerie Dynamique, Institut Pasteur, Paris, France  
                            Advisor: Spencer L. Shorte
- 2009-2011            **Pasteur Foundation Research Fellow: Gould Scholar**  
                            Plate-Forme d'Imagerie Dynamique, Institut Pasteur, Paris, France  
                            Advisor: Spencer L. Shorte
- 2007-2008            **Post-Doctoral Research Fellow**  
                            University of Hull, Hull, UK  
                            Advisor: Paul Watts

## **Education**

- 2006                    **Ph.D. in Analytical Chemistry**, University of Washington  
                            Advisor: Lloyd Burgess  
                            Thesis: *Development of a Cellular Isolation System for Real-Time Single Cell Oxygen Consumption Monitoring*
- 2001                    **Bachelors of Science**, University of Puget Sound  
                            Major: Chemistry

## **Microscopy and Imaging Experience**

- Expertise:            Widefield: Zeiss; Nikon; Olympus  
                            Laser Scanning Confocal: Zeiss: LSM510, LSM510 META, LSM700; Leica: SP5;  
                            Nikon A1R  
                            Spinning Disk Confocal: PerkinElmer Volocity; Andor IQ, IQ2; Nikon SD  
                            Fluorescence Lifetime Imaging: Lambert Instruments, frequency domain; in-house developed systems for both frequency and time domains  
                            Bioluminescence Imaging: PerkinElmer: IVIS Lumina, IVIS 100, IVIS Spectrum;  
                            Olympus LV200; in-house developed systems for single cell bioluminescence imaging  
                            Fluorescence Molecular Tomography: PerkinElmer; in-house developed systems

- Competence/Familiarity:        TIRF: Olympus, Nikon  
                            Two-Photon: Zeiss LSM710  
                            STED: Leica, in-house developed systems  
                            STORM/PALM: Nikon NSTORM; In-house developed systems  
                            High-Content Screening: PerkinElmer Opera; Molecular Devices ImagExpress  
Software/Programming: ImageJ/Fiji, ICY, Huygens, Imaris, OME, Matlab,  
                            Labview, MicroManager

## Teaching and Course Development

- 2014      *Big Data and Image Analysis*  
                Chem6711, University of Colorado, Boulder
- 2011      *Fluorescence by Unbound Excitation from Luminescence*  
                European Molecular Biology Organisation Practical Course on Microscopy: From Single Cells to Animals, Council for Scientific and Industrial Research, Pretoria, South Africa
- 2010      *Microscopy: From Theory to Application - FRAP, FRET, and FLIM*  
                Institut Pasteur, Paris, France
- 2006      *ChemE 499A Sustainable Development Independent Project for Seniors*  
                University of Washington, Seattle, Washington

## Research Supervision

### Masters:

- 2012      Yesim Tüzün-Celotto, European Masters in Molecular Imaging.  
Thesis: *Investigating Fluorescence by Unbound Excitation from Luminescence on Whole-Mouse Cryosections.*  
Currently searching for a PhD position.
- 2011      Ioanna Theodorou, European Masters in Molecular Imaging.  
Thesis: *Fluorescence by Unbound Excitation from Luminescence (FUEL).*  
Currently pursuing a PhD under M. Frédéric Ducongé at the Commissariat à l'Énergie Atomique in Saclay, France.
- 2010      Megdouda Amiri, European Masters in Molecular Imaging.  
Thesis: *Fluorescence Lifetime Imaging to Quantify Sub-Cellular Oxygen Measurements in Live Macrophage during Bacterial Invasion.*  
Currently searching for a PhD position.

### Internships:

- 2013      Carolyn Sinow (Stanford University, 2014), The Pasteur Foundation of New York.  
Currently finishing her degree at Stanford University.
- 2010      Chelsea R. Samson (Biomedical Engineering, Vanderbilt University, 2011), The Pasteur Foundation of New York.  
Currently at Vanderbilt Medical School.
- 2009      Nicholas Perry (Human Biology, Stanford University, 2010), Paul W. Zuccaire Research Fellow and The Pasteur Foundation of New York.  
Currently a Forward Deployed Engineer for Palintir Technologies.

## Awarded Research Grants

<u>Grant Name</u>	<u>Start Date</u>	<u>Duration</u>	<u>Amount</u>
Pasteur Foundation	01/2009	3 years	\$225,000.00
CPAC Research Grant	07/2004	1 year	\$12,000.00
CPAC Research Grant	07/2003	1 year	\$12,000.00

## Conference Presentations

- SPIE BiOS, San Francisco, CA 2011
- 1<sup>st</sup> Scientific Workshop on Advanced Technologies for Life Science, Paris, France 2010
- Young Researchers in Life Science, Paris, France 2010
- Focus on Microscopy, Shanghai, China 2010
- CPAC Satellite Meeting, Rome, Italy 2006 – 2007

## Conference Presentations, continued

- AIChE National Meeting, San Francisco, CA 2006
- CPAC Summer Institute, Seattle, WA 2005 – 2006
- CPAC Semi-Annual Sponsor Meeting, Seattle, WA 2003 – 2006
- FACCS National Meeting, Portland, OR 2004

## External and International Recognition

- Pasteur Foundation Fellowship: Gould Scholar 2009 – 2011
- The Federation of Analytical Chemistry and Spectroscopy Societies (FACSS) Poster Award 2004
- Center for Process Analytical Chemistry (CPAC) Poster Award 2004
- University of Washington Research Fellowship 2001 – 2002
- Murdoch Undergraduate Research fellowship 2000 – 2001
